---

Sharpened with EasyGraver 120°

## BENEFITS & RECOMMENDED USE

The *C-Max Round Blank 1.8 mm* (0.071") is ideal for both fine shading and general metal engraving work.

- Nearly three times stiffer to prevent unwanted tool flex
- Handles a surprisingly wide range of metal engraving uses
- Less waste and faster sharpening than larger blanks

**CAUTION:** Avoid dust inhalation. Carbide tool materials generate harmful dust while being ground or sharpened.

---

For tool sharpening, use the GRS EasyGraver Fixture (#003-700 or #003-701) and QC Tool Holder for 1.8 mm Round Tools (#004-852).
